Your Business AND Our Business

YOUR reputation as a grower of superior flowers and plants is maintained and furthered when you restrict your seed source to one maintaining an equally high reputation for seed production. In no line of endeavor is quality more essential to success or ultimately more economical than in the choice of seeds. It is the foundation of profitable production of salable stock.

Murphy Seed Company insists upon furnishing only seed of the highest quality procurable. We closely watch the growing developments of the foremost commercial growers on the Pacific Coast. We sell seeds to many growers who supply the critical Los Angeles market, nationally known for quality standards. Our first-hand knowledge of seed and flower production, our painstaking selection and reselection of seed from the most superior strains, is an integral and priceless part of every order we fill.

CHRYSANTHEMUMS

To YOU in the TRADE

The dates given in regard to maturity are based on average growing conditions from May and June planting. However, growing and climatic conditions being different in varied localities, they must be taken into consideration in the maturing of the crop.

We specialize in rooted cuttings of chrysanthemums taken from strong stock plants field-grown for this purpose only. We do not grow our flowers in competition with the trade.

The following list is made up of proven cut flower varieties for your selection.

NEW INTRODUCTIONS FOR 1940

Ambitious florists will put themselves in the vanguard by showing these new chrysanthemum blooms to their discriminating customers.
